left on the trees, of which there is a sufficiency, should be of superior quality and size. Later and fuller reports regarding pears indicate that the crop will be somewhat uneven, some districts promising a good crop, while in others there will be none. Peaches continue to look well, I'lums are not up to the average. The strawberry season is about over, except the north, with a scant yield in most instances. Raspberries and blackberries are setting remarkably full, as are also blueberries. They will not be ready to pick

perries. They will not be ready to pick until later than usual.

Vegetables—The frequent showers of the week delayed cultivation in gardens and potato fields, but the slightly increased warmth gave most vegetables a good start. They had been, with the exception of polates, practically at a standsill, but are now in a fair way to make good progress, Fotato vines in all parts of the section are reported as being in most excellent condition, with many fields in blossom. In the south some extra-early planted varieties are being dug and marketed, with a futily good wield. The Colorade have Addressed by Congressman Haskins and J. H. Martin-Endorse State

Platform and Senator W. P. Dillingham-Z. H. Albee Wins the

Probate Judgeship.

Varieties are being dug and marketed, with a fairly good yield. The Colorado beetle, and, in fact, nearly all insect pesus, appear to be less abundant than for some years past. The onlon crop looks well, but will be late. The harvesting of turnip seed has been retarded by rains.

Tobacco-Tobacco is represented as being in first-class condition and making a good healthy growth the past week. The growers who are raising it under cloth are much pleased with the results, as the much pleased with the results, as the
